
Handling Precautions

For Transformers And Reactors

Make sure to read this booklet before use.

Furthermore, any customer who uses the product or is engaged in its maintenance should keep this booklet at a safe place.

Create the electric dream

TOYO ELECTRIC CORPORATION

Safety Precautions

Read this booklet and other attached documents fully and thoroughly before installation, operation, maintenance and inspection, and use the product properly. Use the product after familiarizing yourself with all of the equipment knowledge, safety information and precautions.

After reading, keep them at a place where the person using the product can see them any time.

In this booklet, the safety precautions are classified in two categories i.e. "WARNING" and "CAUTION".

Due to mishandling, a dangerous condition might occur and there is a possibility of death or serious injury.

Due to mishandling, a dangerous condition might occur and there is a possibility of injury and property damage.

Note that even in case of , it may cause a serious result, depending on the situation.

Observe them as they describe important matters.

(General)

- Transportation, installation, piping and wiring, operation, maintenance and inspection, repair and disassembly should be performed by the skilled person(s) who has the knowledge of electrical work, function of transformer, and related law. There is a risk of electric shock, injury or burn.
- Do not perform the work with live line. Do the work only after turning off the power supply.
There is a risk of electric shock.

(Operation)

- Do not approach to the charging section. There is a risk of electric shock.
- Do not touch coil, terminal block and wiring. There is a risk of electric shock or burn.

WARNING

(Maintenance and Inspection)

- For maintenance and inspection, turn off the power supply and ground the main circuit terminal.
There is a risk of electric shock.
- Do not touch the coil immediately after turning off the power supply.
There is a risk of electric shock or burn.

CAUTION

(Transportation)

- Follow the instruction as specified when lifting up.
There is a risk of injury due to drop or fall.
- For transportation or transfer, take appropriate measures to prevent falling.
There is a risk of injury due to fall.

(Installation)

- Follow the instruction as specified when lifting up.
There is a risk of injury due to drop or fall.

(Maintenance and Inspection)

- Do not touch core, metal parts, etc. immediately after turning off the power supply.
There is a risk of burn.

(Relocation)

- Follow the instruction as specified when lifting up.
There is a risk of injury due to drop or fall.

(Disposal)

- Dispose this product as industrial waste.
